

## Nikko Asset Management Taps SmartStream's TLM OnDemand for Reconciliations

TLM OnDemand for reconciliations is the software-as-a-service version of SmartStream's reconciliations technology.

**SmartStream Technologies announced Nikko Asset Management has implemented SmartStream's cloud-based reconciliations solution.**

TLM OnDemand will provide Nikko Asset Management's users with secure, cloud-based access to reconciliations management dashboards, match rules configuration, exception-based workflow processing and reporting.

TLM OnDemand for reconciliations is the software-as-a-service version of SmartStream's reconciliations technology, and will enable Nikko Asset Management users to derive the full benefits of TLM Reconciliations Premium whilst providing a low cost of ownership and faster implementation time.
